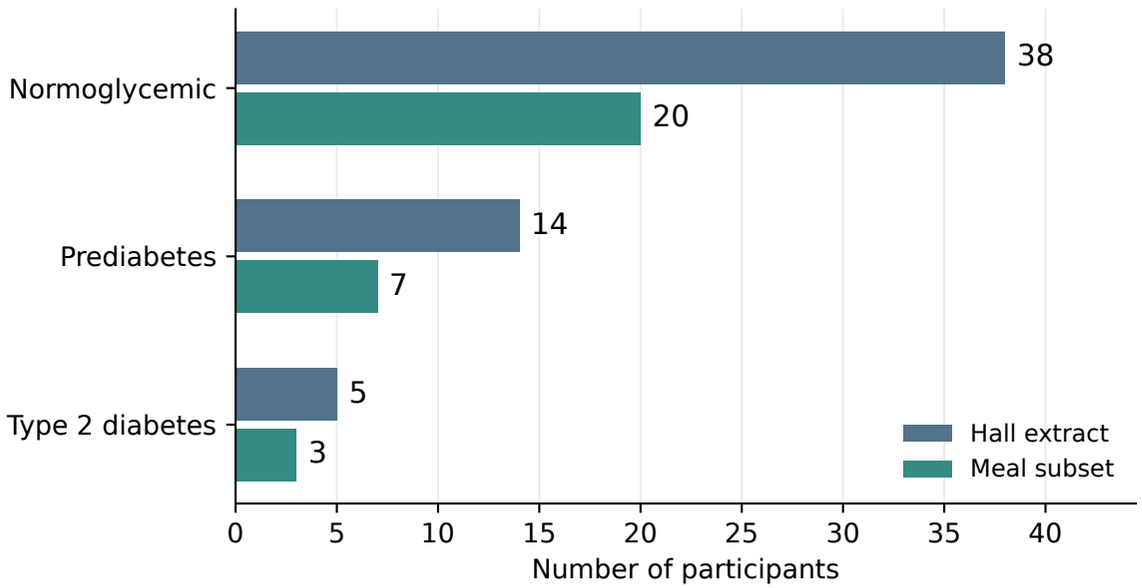
Dataset composition and standardized-meal coverage

57 Hall participants | 30 meal participants | 147 retained meal windows

A | Nested participant cohorts



B | Meal-window quality control

180 nominal meal slots
30 people × 3 meal types × 2 repeats

↓ 4 absent

176 observed windows
6,152 input CGM rows

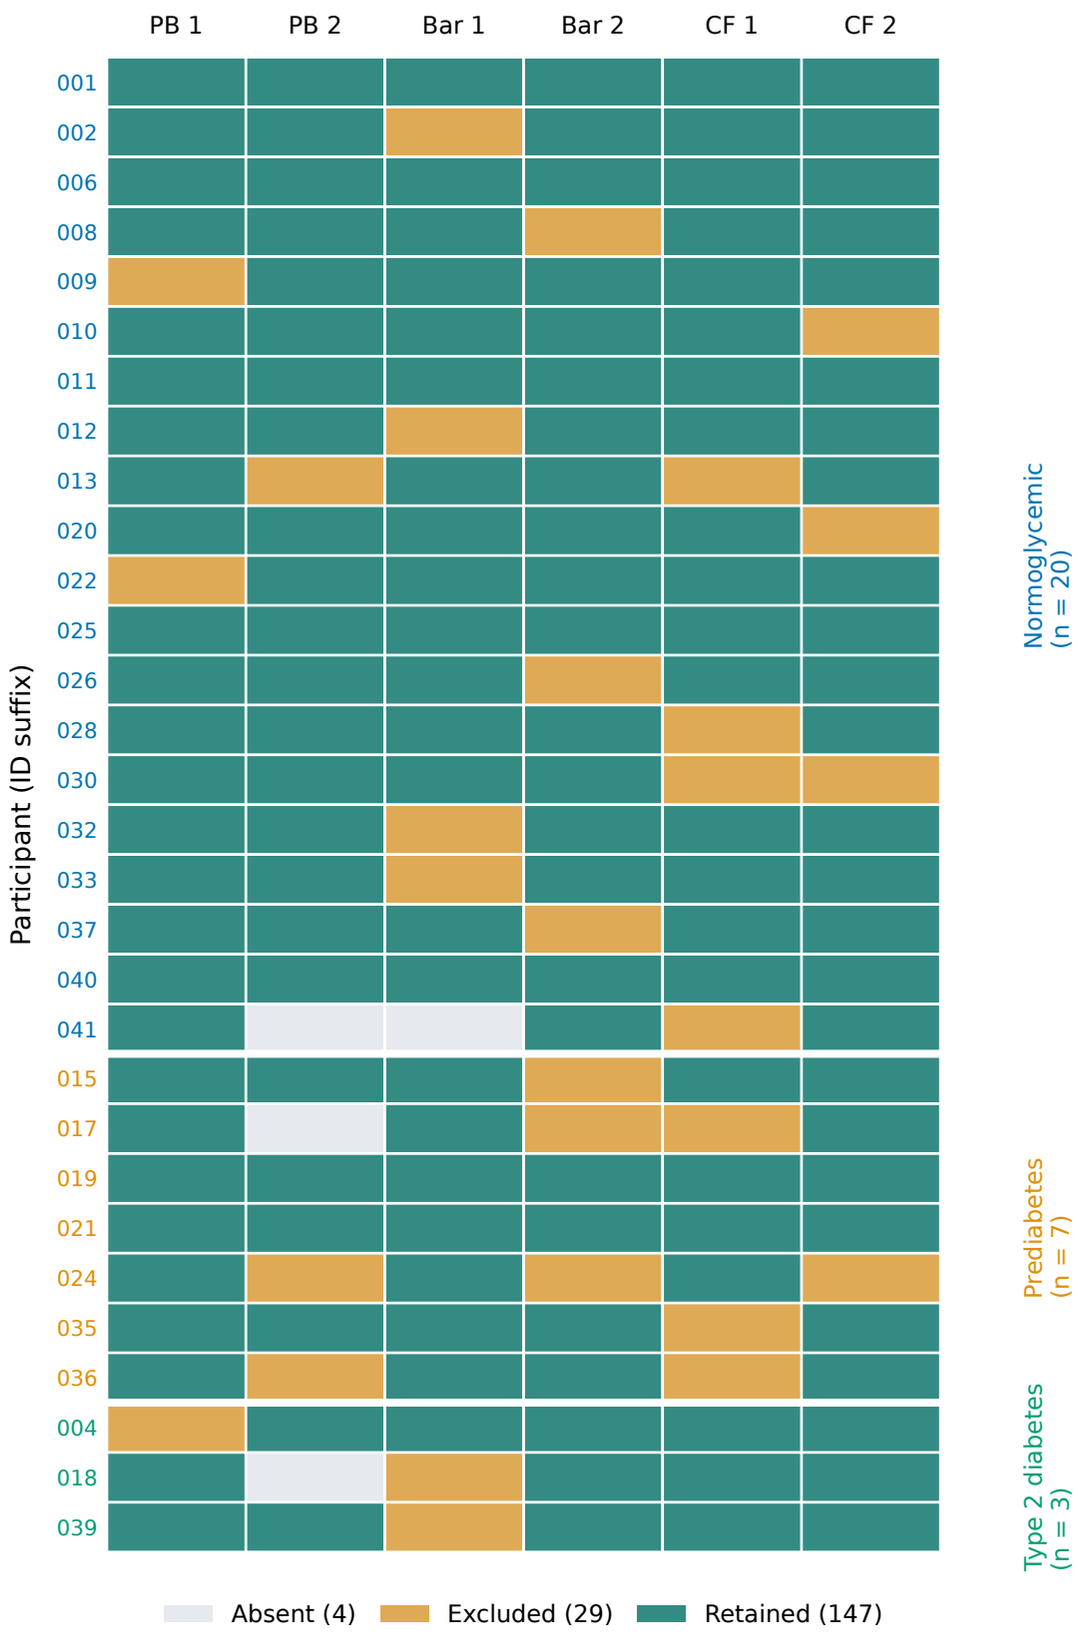
↓ 29 excluded

147 retained windows
30 people; 5,313 unique CGM points

Excluded: 26 incomplete spans + 3 sparse full-span windows

Retained points: 861 pre-meal / 4,452 post-meal (including t = 0)

C | Coverage for every meal participant



Retained = 180-minute span (±0.1 min), ≥24 unique points, and linked participant metadata. Internal missing samples can remain.
